

The official factory source for all Verteq products and services.

## Marteq is the OEM for New Verteq Equipment

Marteq is the official OEM source for Verteq products including the SuperClean™ rinser dryer and Sunburst Turbo™ megasonics. As of July 2008, Marteq acquired these product lines from Akרון Systems. Marteq owns all of the original engineering, documentation, and manufacturing procedures used by the original Verteq factory. The patents covering batch megasonic technologies, including the Sunburst, Sunburst Turbo, and Sunburst Turbo Plus (a.k.a VcS), and the SuperClean nitrogen labyrinth seal originally issued to Verteq have been transferred to Marteq. Single-wafer products and patents remain owned by Akרון.

## New Name, Same Great Quality and Service

The Marteq company was created from the assets of the Verteq factory in Santa Ana, CA, and continues to employ many of the same people that set the quality standard the industry has come to expect from the SuperClean and Sunburst Turbo product lines. The factory has since been moved to a new facility in Santa Ana, CA, just a few miles from the previous location.

We at Marteq are the same people that designed and built the original Verteq equipment, and we look forward to continuing the tradition of high quality manufacturing and service that our customers learned to expect from over 20 years of dedication to excellence.

## Economical Rinser Dryer Reconditioning Services

In addition to new equipment, we sell factory reconditioned rinser dryers. We also buy used rinser dryers to refurbish, and we provide reconditioning services for your original-owner or used rinser dryer.

Buying “as-is” doesn’t mean “ready to perform.” Let Marteq refurbish your used Verteq rinser dryer so it performs at or near original factory capability. We’ll re-electropolish the bowl and rotor to factory specs, recondition the plumbing and control systems, and most importantly, ensure that the nitrogen labyrinth seal meets factory specs so you get that patented SuperClean performance you’re expecting.

## New and Replacement Equipment for:

- Sunburst Turbo™
- Sunburst Turbo Plus™
- Sunburst Turbo Quickdump™
- SuperClean™ 1600
- SuperClean 1800
- SuperClean SC200
